RSA SECURE ID FOR ANDROID SMARTPHONE

In order to access your Remote Desktop from your Android device, do the following steps:

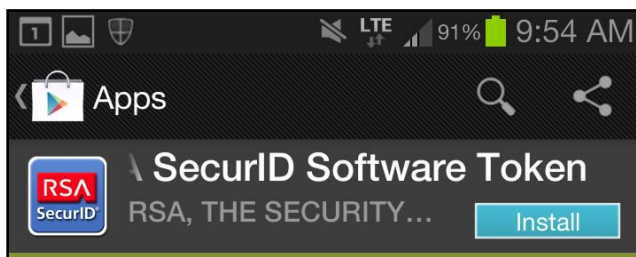

- (a) The recommended program for Android is to open the “**Google Play Store**”. The following is an illustration of the program:

- (b) Search for RSA SecurID free App and tap on the RSA icon. The following is an illustration of this:

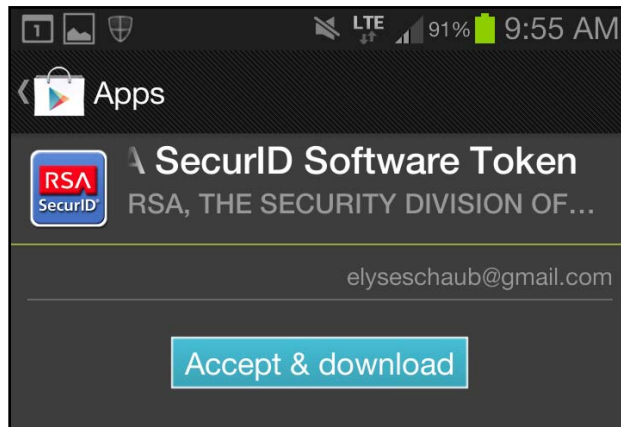

- (c) From the above illustration, tap the RSA application and the following will appear:

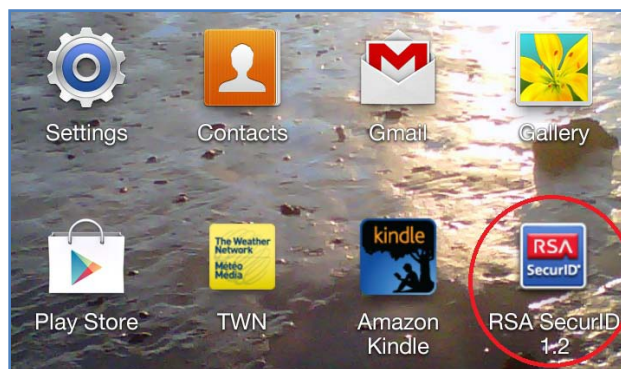

- (d) From the above illustration, tap “**Install**”

- (e) After tapping “Install”, the following will appear:

- (f) From the above illustration, tap “Accept & download”
- (g) Once the download is complete, the RSA application appears on your Android Smartphone as per the following illustration:

- (h) Finally contact the Helpdesk to have the software “token” installed
