BDP VTS1(REMOTE DESKTOP) FOR THE IPHONE

In order to access your Remote Desktop from your iPhone device, do the following steps:

- (a) The recommended program for the iPhone is called "**RSA**"). If you have already installed or updated this application, skip to Page 2 (Running "RSA")
- (b) Installing "**RSA**"
 - (i) Open the "**App Store**"
 - (ii) Search for "**RSA**" and select "**Free**". The following is an illustration of this:

iPhone

RUNNING "RSA"

- (a) After installing the application, do the following:

- (i) Run "RSA" from the main screen

LOGGING ON TO BDP VTS1 (REMOTE DESKTOP)

Please refer to "BDP Remote Access Systems" on "Help & Support" on the Intranet or visit www.bdplaw.net to log on to Remote Desktop via the different operating environments (i.e. Windows XP, Windows 7 or Mac)
